## Show Tips

### **DIVISION 1 - Flowers**

This is not a "flower arrangement" division (see Div. 8 for those), but a pleasing display of flowers in tip top condition strictly according to the class. Pick stems as long and straight as possible and preferably condition them in a bucket of cold water the night before the show, protect from rain and wind.

**Specimen** means a bloom chosen for closeness to the ideal shape, colour and condition. **Disbudded** means take off all the buds.

Specimen dahlia blooms should have no side shoots.

Check your dahlia belongs to either the *cacti* or the *decorative* type.

Cut only the lower leaves from the stems of specimen roses.

**Hybrid Tea (HT) roses** have a group of central petals which come to a point.

**Floribunda roses** means many blooms from one main stem.

**A Bedding Plant** usually lasts for one year only. The plant is put in a flower bed or pot before it flowers, and is then removed after flowering.

Note the size of vase where given. Use oasis, moss or scrunched newspaper to pack the stems in the vase where necessary.

For the **herb** class, use herbs NOT in flower.

### **DIVISIONS 2, 3 and 5 - Vegetables and Fruit**

Aim for blemish-free and uniform size & shape, maintaining the natural bloom.

**Beans and Peas:** Leave a little of the stalk showing.

**Shallots:** Exhibition class – turn tops over and bind with raffia.

Display on a plate or dish of sand.

**Tomatoes:** Leave the calyx on (green top-knot!).

**Cucumber & Courgettes:** Can be shown with or without the flower attached.

**Potatoes & Root Vegetables:** Lift potatoes 4 or 5 days beforehand to allow them to dry off before cleaning. Do not scrub, lightly clean with damp sponge.

Many vegetables you can harvest over the days before the show and keep wrapped in damp newspaper in the fridge. Spreading the harvest can help achieve a same size batch and lighten the last minute work load.

**Use the internet to find more Tips.**
